

WatchGuard Compliance Reporting

Simplify Compliance with Automated Controls and Reporting

WatchGuard Compliance Reporting is an automated, compliance reporting engine for WatchGuard's NDR solution. It utilizes hundreds of prebuilt, automated compliance controls based on the NIST 800-53 and ISO 27001 frameworks. Since most regulatory laws are derived from the NIST and ISO frameworks, mapping controls and creating reports to address your compliance requirements are simple and straightforward. Utilizing AI-driven security policies, WatchGuard NDR reduces the massive volume of network traffic into prioritized smart alerts, investigative views, and compliance reports.

Controls can be easily added or modified within WatchGuard NDR. These controls automatically integrate with the WatchGuard Reporting Engine, allowing for easy report configuration or the creation of new reports by simply selecting the necessary controls and activating them with the push of a button.

Instant Compliance Visibility

Each report includes an overall compliance score based on the control effectiveness of the entire control framework. The report then details each control's effectiveness against its compliance objectives, the trend line of the controls' effectiveness, and guidance on correcting control failures.

Expansive Coverage

Reports include ISO-27001, NIST 800-53, NIST-171/CMMC, UK cyber essentials, and easily configurable control mapping and report creation for insurance audit compliance and industry regulatory compliance like the Motion Picture Association (MPA) framework, CIS critical security controls, and IEEE standards.

Save Time and Money

Security teams save time and money with these easy-to-activate, prebuilt policies and reports. It's uncomplicated to configure control models and add new models. WatchGuard NDR compliance controls and reporting eliminate manual control assessments, validation, and report creation, saving hundreds of hours of labor.

Benefits

- Prove compliance status with a click of a button. Quickly generate compliance reports for auditors, partners, suppliers, and insurance providers.
- Reduce cost of compliance by automating highly manual processes, reducing human costs and workloads on IT teams.
- Improve compliance posture utilizing control effectiveness reports to recognize compliance gaps and take practical remediation actions with control improvement guidance.
- Simplify compliance process with easy-to-configure, out-of-the-box control sets to implement and report against new, changing, and expanding compliance requirements.

How Small Teams Meet Compliance Objectives

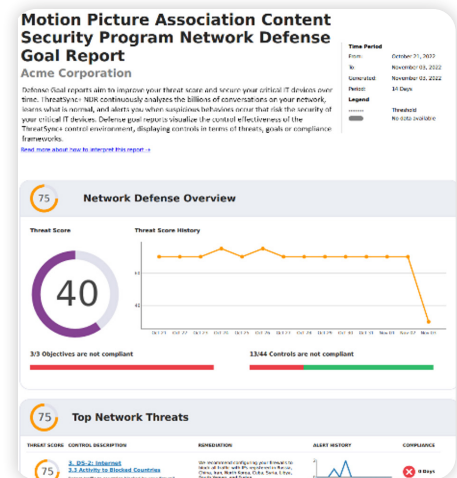

WatchGuard Compliance Reporting paired with WatchGuard NDR delivers an automated network compliance reporting solution that's easy to configure and operate, saving money and time while enabling organizations to continuously comply with changing regulations and standards.

With over one hundred prebuilt controls (more are added monthly) and an easy-to-configure policy engine, core controls can be built, modified, and deployed within WatchGuard NDR. WatchGuard Compliance Reporting automatically ingests all controls and control changes to create reports with just a few clicks. New reports covering special use cases can also be quickly configured from the NIST, CSF, and ISC frameworks.

Compliance Reports Include:

- ThreatSync and Firebox integration enables the coordination and automation of multiple processes and tools with security orchestration, providing a cohesive security posture.

Deliver Affordable, Expansive, and Unified Threat Detection and Response

WatchGuard Technologies is a global leader in unified cybersecurity, purpose-built for managed service providers (MSPs). For more than 30 years, WatchGuard has defined how MSPs deliver security at scale, continuously innovating to stay ahead of every major shift in the threat landscape. WatchGuard's AI-powered Unified Security Platform® delivers zero trust-aligned network, endpoint, and identity protection in a single, integrated platform, enabling MSPs to reduce operational complexity, improve security outcomes, and grow their businesses more efficiently. Trusted by more than 25,000 MSPs protecting over 1.5 million customers worldwide, WatchGuard enables partners to deliver strong, measurable security outcomes for customers across the globe.
